

VALENTINES DAY...

... on Sunday 14th Feb marks the day a young priest was executed by the Roman Emperor for conducting secret marriages after they had been made illegal. Valentine believed love was very important and couples who wanted to be together should be allowed to marry. He became St. Valentine after his death and we mark the day by sharing messages of love. The messages can be secret or anonymous. Usually it is by exchanging or sending cards. Below are designs to help you make cards or love tokens. Maybe you could colour them all and make a mobile for all those you love.
